

**With food- and  
drinking water approval.**

**MAKAMID<sup>®</sup> based on Polyamide 6 and MAKAFORM<sup>®</sup>  
based on POM copo with food- and drinking water  
approval.**

**MAKAMID® and MAKAFORM® with food- and drinking water approval**

A wide range of plastic is used in the food area. For their use, in different applications like household appliances or packaging, they have to fulfil a number of requirements to come in contact with food or drinking water.

Currently are the following materials available in the MAKAMID® and MAKAFORM® range. They fulfil the requirements for contact with food and drinking water and they have the necessary approvals:
